Features

Designed, engineered and built - all in the USA
Aerospace grade materials used throughout
High grade aluminium for the control box, motor cover and heat sink - aluminium dissipates heat, as opposed to plastic which retains it
Steel cut and precision ground gears - running in synthetic grease for positive heat transfer
Frame from chrome plated heavy walled steel tubing, immensely strong and tough
TriTech proprietary carbide blend is used for the ball and seat to give a superior and positive shut off
All covered by the unique TriTech warranty
